SUMMARY

I am a software developer with over 3 years experience in converting UI/UX designs into functional and production-ready apps or websites. I am a result-oriented and self-driven individual with strong communication and leadership skills. I am highly adaptable to change and always eager to stay updated on emerging technologies. I am committed to writing clean and maintainable codes, learning and utilizing the right technologies to deliver results efficiently.

CORE SKILLS AND TOOLS

- Frontend (UI): HTML5, CSS3, JavaScript, React, Next.js, Astro, Shadcn UI
- Backend: Node.js, Firebase (As a Service: Database, Authentication, Hosting, Storage)
- State Management: Redux, Zustand (React), Pinia, Vuex (Vue)
- Version Control: Git
- Soft Skills: Analytical Thinking, Time Management, Teamwork.

PROFESSIONAL EXPERIENCE

Market Master USA

October 2024 - Present

Frontend Web Developer, Web Designer

- Designed and developed responsive, cross-platform websites and web applications using HTML, CSS, and JavaScript, ensuring consistent experiences across all devices and browsers.
- Translated UI/UX wireframes and visual designs into pixel-perfect, functional web interfaces.
- Optimized websites for performance, SEO, and accessibility to enhance user experience and meet industry standards.
- Collaborated closely with back-end developers to integrate front-end components with server-side functionality, delivering seamless user interactions.
- Identified and resolved front-end bugs, performance bottlenecks, and cross-browser compatibility issues.
- Kept up to date with emerging front-end technologies, frameworks, and design trends to deliver modern, scalable web solutions.
- Implemented front-end security best practices to protect user data and maintain site integrity.

Davies Limited

April 2024 - June 2024

Software Engineer

- Enhanced the user interface of a management system using Vue.js.

- Integrated APIs on the backend to resolve navigation issues, improving the user experience by 15%.

Streams Foundation

December 2023 - March 2024

Front-end Web Developer

- Converted UI designs for landing pages and user accounts into functional code using Next.js.
- Integrated APIs to display user information and collaborated on design iterations, contributing to improved product usability.

Hotels NG (Zuri HNGix)

September 2023 - October 2023

Front-end Developer (Internship, Remote)

- Developed responsive web apps using React and Tailwind CSS, ensuring high-quality user experience across devices.
- Collaborated with a team to address key issues in several applications, employing agile methodologies to ensure timely project delivery.

Labwox

April 2023

Full-Stack Web Developer (Remote)

- Transformed Figma designs into pixel-perfect web applications using React and Tailwind CSS.
- Managed application state with Redux and implemented animations with Framer Motion.
- Utilized Firebase for backend functionalities, including authentication, hosting, and storage.

Hotels NG (Zuri HNGi9)

October 2022 - November 2022

Front-end Developer (Internship, Remote)

- Converted modern designs into responsive web applications using React and Tailwind CSS.
- Contributed to open-source projects like Zuri Chat App and collaborated with team members to solve major development issues.

EDUCATION

Obafemi Awolowo University,
Ile-Ife, Osun State
B.Sc. Civil Engineering

PROJECTS

Personal Portfolio: Designed and developed a personal portfolio website using React and Tailwind CSS. Integrated it with Firebase for hosting and backend services. [Portfolio](#)
